

## Facilities Development

The District believes that a quality educational program is affected to a great extent by the environment within which it functions. The development of a quality educational program and school facilities that align and support academic programs go hand in hand.

It is the goal of the Board to provide and maintain the number of facilities needed for the enrollment and the types of facilities supportive of the educational program.

The Executive Director of Support Services shall have responsibility for the construction, renovation, care, modification, maintenance, and protection of all District property including physical plants (buildings and grounds), and shall establish such procedures and employ such means as may be necessary to perform this responsibility.

Procedures shall comply with all applicable government requirements and statutes and meet or exceed industry standards and generally accepted business practices.

Approved April 11, 2007
