

**QUESTIONS FOR EVALUATING
PILOTED COURSES**

Course: _____ Presenter: _____

Pilot Year: 1 2 3

This evaluation form will be used by District Curriculum Review Committee members at the time the pilot report is made by the teacher(s). The questions on this form will help the committee members to make a decision regarding whether or not the proposal should be denied pilot or course status, given another year of pilot status or given approval as a District course.

1. Did the rationale of this course, as originally stated in the "Intent to Develop Curriculum" form, appear to be supported by the pilot results?

2. How did the pilot support the content standards of one or more content areas?

3. What building or District goals did this pilot support?

4. Have the methods of evaluating student achievement and reporting that data been satisfactorily detailed? Did the pilot report use student work to demonstrate what students were to know and be able to do as well as how the learning was assessed?

Do you recommend that this proposal be:

- _____ Denied pilot or course status
- _____ Given pilot () status
- _____ Approved as a district course

Please briefly give your primary reasons for your choice:

Signature of Committee Member

Revised March 28, 2007

St. Vrain Valley School District RE-1J, Longmont, Colorado
