

Student Health Services and Requirements

The purpose of school health services shall be to supplement the efforts and guidance of parents/guardians to raise student awareness of the benefits of regular health care.

The objectives of school health services are:

1. To promote good health habits among students.
2. To encourage a safe and healthful environment in school.
3. To assist in identification and referral to appropriate health care providers for medical, psychological and physical needs.

Student Health records

Student health records shall remain confidential and be maintained by the health office staff and kept in a separate and secure health file in the school health office. Access to the health files shall be limited to only those school personnel who have a specific and legitimate educational interest in the information for use in furthering a student's academic achievement or maintaining a safe and orderly teaching environment. The health office staff shall maintain a log showing who has been given access, when access occurred, and to which specific records.

Annual screening programs

The vision and hearing of all students in kindergarten, first, second, third, fifth, seventh and ninth grades or students in comparable age groups referred for testing shall be tested during the school year by health services personnel and/or other trained persons authorized by the District, as required by law. The parent/ guardian shall be informed if a student fails any part of the screening.

Parental consent

Parental consent shall be required for all examinations noted above if given by a school health care provider or under auspices of the school. However, parental consent shall not be mandatory to refer a student to public health or other health care providers for medical services in connection with pregnancy, venereal disease, or alcohol/drug abuse. The District shall encourage students to seek health services related to such problems with or without parental consent.

As otherwise provided by law, parents/guardians and eligible students (students 18 years of age or older or an emancipated minor) shall receive notice and have the opportunity to opt a student out of any non-emergency, invasive physical examination or screening (such as routine hearing, vision, and dental screenings) that is:

1. normally required as a condition of attendance;
2. administered by the school and scheduled by the school in advance; and
3. not necessary to protect the immediate health and safety of the student, or other students.

Dental health

The District shall participate in programs to encourage good dental health including instruction, dental examination clinics and referrals to agencies which can provide aid for those in need.

Communicable diseases

Students showing possible symptoms of a communicable disease or an infectious illness shall be referred to health office staff. As appropriate the school nurse will be notified and assist in identifying the action necessary to protect the health of other students and staff.

Special health problems

Health services personnel shall assist teachers and building principals in making any necessary arrangements with the family health care provider for the welfare of a student with special health problems. Requests that health care procedures be performed at school shall be evaluated in accordance with Board policies and regulations to determine whether and under what conditions a requested procedure may be appropriately conducted in the school environment.

Medications shall be administered only in accordance with Board policy.

School personnel shall be specifically notified of any students with significant health conditions in their building as long as such notification is required to meet a student's needs. School personnel shall be informed of any reactions/symptoms that may be observed from students with medical conditions such as for diabetes, epilepsy and asthma.

Note: A health care provider is defined as an M.D., D.O., Nurse Practitioner, P.A., Dentist or Psychiatrist.
